

Diamatic 250S grinding discs

Always use DIAMATIC genuine spares and tools: they are especially designed for heavy duty professional use, and will ensure a longer life time for your equipment!

The tools listed below are designed to be fitted on DIAMATIC 250S single-disc grinder.

DIAMATIC quality Ninja discs:

- ❖ 12 segments with specific "dot" design: each segment is covered with little plugs, which will attack the floor first, thus letting the diamond open much faster, for an optimized grinding efficiency.
- ❖ Specific design, increased dust extraction when used with a DIAMATIC dust collector fitted with standard M-class filters that are especially designed for a dust free job site.

Article code	Description
BG707111	Ninja disc blue. <ul style="list-style-type: none">❖ Working width Ø 250mm.❖ Blue: hard bond segments for soft floors.❖ Light weight, perfect balance, improved efficiency.
BG707112	Ninja disc green. <ul style="list-style-type: none">❖ Working width Ø 250mm.❖ Green: medium bond segments for universal floors.❖ Light weight, perfect balance, improved efficiency.
BG707113	Ninja disc red. <ul style="list-style-type: none">❖ Working width Ø 250mm.❖ Red: soft bond segments for hard floors.❖ Light weight, perfect balance, improved efficiency.
E04045	High quality cutter plate. <ul style="list-style-type: none">❖ Working width Ø 250mm.❖ Equipped with 5 rotary cutting heads.❖ 4 heavy duty, long life tungsten carbide tools.❖ Efficient scarifying action.❖ For removal of elastic glues, and other flexible materials.
