

Diamatic grinding wings

DIAMATIC wings are designed to be fitted on every DIAMATIC 3-headed planetary grinder, as on similar equipment from other suppliers.

- ❖ DIAMATIC wings are suitable for fitting on the revolutionary and patented DIAMAG quick release system. Biggest benefit from the DIAMAG system is that users do not need any tools (like hammer / screws / etc) to insert or remove the wings or resin dots from the adapter plates.
- ❖ Each wing has got 2 segments with specific "dot" design: each segment is covered with little plugs, which will attack the floor first, thus letting the diamond open much faster, for an optimized grinding efficiency.
- ❖ DIAMATIC wings are delivered by sets of 9 pieces: 3 wings for each one of the 3 planetary heads.

Article code	Description	
	RED: soft bond segments for hard floors.	
BG707301	Grit size 18/20 Grinding of coatings and thin layers.	
BG707302	Grit size 30/40 Grinding to create suture and/or grinding of top floors.	
BG707303	Grit size 60/80 Grinding to create suture for water based coatings and/or grinding to get basis for polishing.	
BG707304	Grit size 120/150 Polishing. Last metal bond step before starting with resin dots.	
	GREEN: medium bond segments for universal floors.	
BG707311	Grit size 18/20 Grinding of coatings and thin layers.	
BG707312	Grit size 30/40 Grinding to create suture and/or grinding of top floors.	
BG707313	Grit size 60/80 Grinding to create suture for water based coatings and/or grinding to get basis for polishing.	
BG707314	Grit size 120/150 Polishing. Last metal bond step before starting with resin dots.	
	BLUE: hard bond segments for soft floors.	
BG707321	Grit size 18/20 Grinding of coatings and thin layers.	
BG707322	Grit size 30/40 Grinding to create suture and/or grinding of top floors.
